

# EGRESS SYSTEM

The only vinyl egress system available on the market today... Features stainless steel hinge and fasteners for durability and performance.

Closed Egress Frame

Open Egress Frame

Selecting the desired window type/style for your home should be completely your decision. However, the egress building codes (a safety fire escape/rescue requirement) can be a factor in limiting your selection.

The egress code states that bedrooms require a minimum size window opening of 5.7 sq.ft. for emergency egress, limiting your window selection to one large unit.

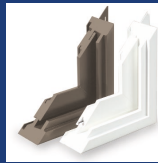

The Coastal Egress System is actually a window frame, not a window itself. Smaller window units can be placed into the Coastal Egress Frame enabling smaller units to swing open for egress as one large unit.

Coastal Windows is the only vinyl window company that has an egress system, which virtually makes all our windows egress compliant, giving homeowners back their freedom of choice in selecting windows for the home.

*Check your local Building Department for any special or additional requirements.*

# OPTIONS

All Coastal windows and doors are custom manufactured to your specifications. Choose the size, style and options to complement your island home.

**Colors:**  
Choose from white or bronze.

**Grids:**  
Dimensional for a true divided-lite appearance.

**Glazing:**  
Choose from clear, tint, obscure, laminated, tempered glass and more.

**Installation:**  
Nail Flange or Block Frame. All windows and doors are manufactured with nail flange, allowing for easy installation in new construction. The flange can be easily removed for replacement applications (block frame).

Coastal offers a complete line of vinyl windows and doors manufactured in Hawaii for a lifetime of beauty and performance. Our products have been independently tested and commercially rated to meet or exceed ANSI/AAMA 101-93 standards.

See your Coastal Windows representative for a complete list of product lines and options.

# AWNING & CASEMENT *Windows*

*Simply the Best for Hawaii*

Since 1990, Coastal Windows has served the islands with the only vinyl windows and doors designed, manufactured and installed to perform in Hawaii's tropical environment. We understand the challenges presented by Hawaii's unique climate. The harsh sun, wind-driven rain and salt air are a daily concern for island homeowners, and our entire product line has been engineered specifically to meet these challenges.

Whether you're building a new home or simply improving an existing one, we can help you choose the windows and doors to complement your island lifestyle, while assuring your complete satisfaction with the quality and performance of our products with our lifetime guarantee.

We invite you to take a look and see how you can enhance the value, security and beauty of your home for a lifetime. We know the more you get to know us, the more you'll understand why Coastal

windows and doors are *simply the best for Hawaii!*

## A W N I N G

**Coastal Awning windows are hinged at the top and crank open... allowing the tropical breezes in, while keeping the rain out.**

### AWNING STYLES:

**Advantage Awning** operator is mounted on the side and opens approximately 90 degrees.

**Commercial Awning** operator is mounted on the bottom and opens approximately 45 degrees.

Window units operate individually for added versatility.

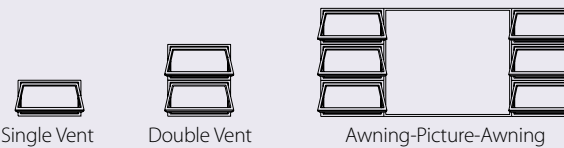

## C A S E M E N T

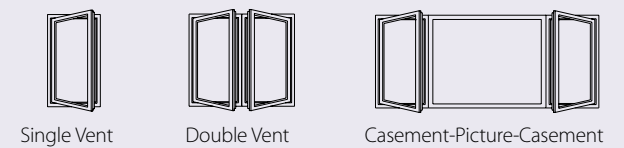

**Coastal Casement windows are hinged on the side and crank open... allowing you to redirect the cool trade winds and draw them into your home.**

### Awnings

### Casements

**Stack vertically or horizontally to create a virtually limitless variety of combination design possibilities.**

### Our Awning and Casement windows feature:

- 100% ventilation
- Solid vinyl frame, thermal-welded for strength and seal, to provide a lifetime of attractive, low maintenance beauty and performance
- Individual operator for added versatility
- Variety of handles to choose from to meet your specific needs
- Stainless steel hinges, fasteners and keepers to resist corrosion
- Overlapping frame and sash design provides superior air and water seal
- Double synthetic rubber gaskets designed to resist ozone and ultraviolet degradation

- Double cam lock standard provides a high level of security
- Exclusive Coastal Cam Lock. Unlike other cam locks used in the industry, our Coastal cam lock is non-metallic and therefore, non-corrosive. Engineered of a fiber reinforced, high impact plastic for strength and performance, it will not rust, corrode or deteriorate like its metal counterparts.
- Exterior glazing for superior air and water seal
- Screen flush mounted on the inside for easy cleaning, both inside and out
- Commercially rated
